HYBRID SEED CORN

All varieties listed below are NORMAL CYTOPLASM (hand-detasseled)—and such corn withstood the Southern Corn Leaf Blight in 1970. All in 50-lb. paper bags and treated, except DeKalb in 56-lb. (1 bu.) Coker is certified. We are being prorated on all varieties. Therefore, we must necessarily accept all orders SUBJECT TO AVAILABILITY OF THE CORN. WE ARE ALREADY OVERSOLD ON MOST VARIETIES. However, we have ample DeKALB ABATI, LF, yellow—so order what you want. Abati is a flint corn from Argentina of 100% NORMAL CYTOPLASM, capable of yielding 100 bu. per acre if well fertilized & 18-20,000 plants per acre. Runs 1 to 2% higher in protein than other hybrids. Excellent corn for grain & silage. Also we now have similar "flint" corn put out by Funk in 50's. DeKalb is in 56's. OUR ADVICE: order some DeKalb or Funk's while you can get it
